

QUARTERLY OPERATIONS REPORT

[QUARTER] operations report

Prepared for [CLIENT NAME]

Sites covered [NUMBER] sites

Reporting period [START DATE] to [END DATE]

Prepared by [AUTHOR], [ROLE]

Issued [DATE]

Northwind Facilities

Template · replace every highlighted field

Contents

Summary.....	3
Performance by site.....	3
Incidents and actions.....	3
Next quarter.....	3
Sign-off.....	4
How to use this template.....	4

A plain list, so it shows correctly in Word, Google Docs and phone previews alike. Page numbers in the footer update on their own.

Summary

[000]

JOBS COMPLETED

[00%]

SLA MET

[00]

SITES ACTIVE

Block 1 of 4 — KPI row. Copy this table for any three-number summary.

Two or three sentences a site manager can stop reading after. State what moved, by how much, and whether anything needs a decision. Replace **[this text]**.

Performance by site

SITE	JOBS	SLA MET	VS LAST QUARTER
[SITE]	[000]	[00%]	[+/- 0%]
[SITE]	[000]	[00%]	[+/- 0%]
[SITE]	[000]	[00%]	[+/- 0%]
[SITE]	[000]	[00%]	[+/- 0%]

Block 2 of 4 — comparison table. Add rows with Tab from the last cell; the banding is part of the style.

Notes on the quarter

Anything the table cannot say on its own goes here. Keep it to one paragraph per site that needs explaining.

Incidents and actions

One line of context, then the list. Every item is an action with an owner and a date, not an observation.

- **[Action]** — owner **[NAME]**, due **[DATE]**
- **[Action]** — owner **[NAME]**, due **[DATE]**
- **[Action]** — owner **[NAME]**, due **[DATE]**

Next quarter

What changes, what stays, and what you need from the client. If nothing is needed from them, say that in one sentence rather than leaving it out.

Sign-off

PREPARED BY

[AUTHOR]**[ROLE] · [DATE]**

APPROVED BY

[NAME]**[ROLE] · [DATE]**

Block 4 of 4 — sign-off. Both columns are optional; delete one and the other stays put.

How to use this template

Six styles do all the formatting

Never set a font or a size by hand. Put the cursor in a paragraph and pick a style from the Styles pane: Report title, Section, Subsection, Body text, Table header, Figure caption. If a heading looks wrong, the wrong style is applied — that is the only thing that can be wrong.

Four blocks to copy

KPI row, comparison table, bulleted action list and sign-off. Select the whole block, copy, paste where you need it, then replace the fields.

Fields are the orange text

Everything in orange is a placeholder. When the document is finished, search for the opening bracket to confirm none are left. Type over a field and it takes the normal text colour by itself.

Contents and page numbers

Page numbers in the footer look after themselves. The contents list on page 2 is a plain list on purpose, so the document previews correctly outside Word — edit it when you add a section, or replace it with an automatic table of contents if everyone who opens the file uses Word.

Changing the brand fonts

The template ships with Georgia for headings and Calibri for body, because both exist on every machine. To swap in a brand font, edit the six styles once — nothing else in the document names a font.
